ENERGY POLICY

Index to Volume 30

January, February, March, April, May, June, July, August, September, October, November, December

Articles—Titles

Electricity

Electricity consumption and economic growth in India *S Ghosh* 30:2, 125–129

Electricity sector reform in Cameroon: is privatisation the solution? *P-O Pineau* 30:11/12, 999–1012

Encouraging distributed generation of power that improves air quality: can we have our cake and eat it too? *J E Allison and J Lents* 30:9, 737–752

Experience and new challenges in the Chilean generation and transmission sector *O E Moya* 30:7, 575–582

Is the Kenyan electricity regulatory board autonomous? *P Nyoike* 30:11/12, 987–997

Life-cycle assessment of electricity generation options: the status of research in year 2001 *L Ganon, C Bélanger and Y Uchiyama* 30:14, 1267–1278

Reforming Israel's electricity sector *A Tishler, C-K Woo and D Lloyd* 30:4, 347–353

Relative efficiency measurement and prospects for yardstick competition in Brazilian electricity distribution *M Resende* 30:8, 637–647

Responses to electricity liberalization: the regional strategy of a Chilean generator *P del Sol* 30:5, 437–446

Restructuring and privatising electricity industries in the commonwealth of independent states *R P Anex* 30:5, 397–408

Rural electrification programme with solar energy in remote region–a case study in an island *Snigdha Chakrabarti and Subhendu Chakrabarti* 30:1, 33–42

Status of power sector reforms in Africa: impact on the poor *S Karekezi and J Kimani* 30:11/12, 923–945

Tariffs and subsidies in Zimbabwe's reforming electricity industry: steering a utility through turbulent times *S E Mangwengwende* 30:11/12, 947–958

The demand for electricity in the GCC countries *A R F Al-Faris* 30:2, 117–124

The economics of the combined cycle gas turbine–an experience curve analysis *U C Colpier and D Cornland* 30:4, 309–316

Transmission capacity and market power: the effect on a dominant generation firm *D M Quick and J M Carey* 30:8, 699–708

Energy conservation and efficiency

Aggregating physical intensity indicators: results of applying the composite indicator approach to the Canadian industrial sector *M Nanduri, J Nyboer and M Jaccard* 30:2, 151–163

ASEAN tigers and sustainability of energy use – decomposition analysis of energy and CO_2 efficiency dynamics *J Luukanen and J Kaivo-oja* 30:4, 281–292

Benchmarking the energy efficiency of Dutch industry: an assessment of the expected effect on energy consumption and CO_2 emissions *D Phylipsen, K Blok, E Worrell and J de Beer* 30:8, 663–679

Lithuanian energy efficiency project *E Kazakevičius, A Vitkauskas and S E Mikkelsen* 30:7, 621–627

Voluntary agreements – a measure for energy-efficiency in industry? Lessons from a Swedish programme *A-L Lindén and A Carlsson-Kanyama* 30:10, 897–905

Energy and the environment

A Shapley decomposition of carbon emissions without residuals *J Albrecht, D Françoise and K Schoors* 30:9, 727–736

Boundary problem in carbon emission decomposition *B W Ang and K-H Choi* 30:13, 1201–1205

CO_2 in the iron and steel industry: an analysis of Japanese emission reduction potentials *D Gielen and Y Moriguchi* 30:10, 849–863

Determinants of emissions growth in OECD countries *C Hamilton and H Turton* 30:1, 63–71

Environmental benefits on a life cycle basis of using bagasse-derived ethanol as a gasoline oxygenate in India *K L Kadam* 30:5, 371–384

Escaping carbon lock-in *G C Unruh* 30:4, 317–325

Estimation and control of Spanish energy-related CO_2 emissions: an input-output approach *X Labandeira and J M Labeaga* 30:7, 597–611

Greenhouse gas emissions and barriers to implementation in the Jordanian energy sector *J O Jaber* 30:5, 385–395

International comparison of CO_2 emission trends in the iron and steel industry *Y Kim and E Worrell* 30:10, 827–838

Tradeable carbon permit auctions. How and why to auction not grandfather *P Cramton and S Kerr* 30:4, 333–345

Vintage structure dynamics and climate change policies: the case of US iron and steel *M Ruth and A Amato* 30:7, 541–552

Energy modelling

A system perspective on the heating of detached houses *L Gustavsson and A Karlsson* 30:7, 553–574

A Chinese cokemaking process-flow model for energy and environmental analyses *K R Polenske and F C McMichael* 30:10, 865–883

Forecast errors in IEA-countries' energy consumption *H Linderoth* 30:1, 53–61

Energy policy and analysis

An examination of the effectiveness of the EU minimum standard on cold appliances: the British case *P Schiellerup* 30:4, 327–332

Emission trading under the Kyoto Protocol – effects on fossil fuel markets under alternative regimes *B Holtsmark and O Mæstad* 30:3, 207–218

Energy policy modelling: agenda for developing countries *R Pandey* 30:2, 97–106

External costs of energy – do the answers match the questions? Looking back at 10 years of ExternE *W Krewitt* 30:10, 839–848

Hot air in Kyoto, cold air in The Hague – the failure of global climate negotiations *U S Brandt and G T Svendsen* 30:13, 1191–1199

Investment cost estimates and investment decisions *K Emhjellen, M Emhjellen and P Osmundsen* 30:2, 91–96

Market potential for Kyoto mechanisms – estimation of global market potential for co-operative greenhouse gas emission reduction policies *K Halsnæs* 30:1, 13–32

Mitigating global warming: traditional versus alternative approaches in a planning versus a market context *B Olerup* 30:8, 709–716

Prospective analysis of beyond Kyoto climate policy: a sequential game framework JC Ciscar and ASoria 30:15, 1327–1335

Public policy for energy technology innovation. A historical analysis of fluidised bed combustion development in the USA *S Bañales-López and V Norberg-Bohm* 30:13, 1173–1180

The additionality criterion for identifying clean development mechanisms projects under the Kyoto Protocol *R M Shrestha and G R Timilsina* 30:1, 73–79

The effects of environmental fiscal reform in Germany: a simulation study *S Bach, M Kohlhaas, B Meyer, B Praetorius and H Welsch* 30:9, 803–811

The price of independents: an analysis of the independent power sector in England and Wales *J R Branston* 30:15, 1313–1325

The role of exergy in energy policy making *I Dincer* 30:2, 137–149

What will happen to the producer prices for fossil fuels if Kyoto is implemented *M Radetzki* 30:5, 357–369

Energy security and world trade

Managing climate risks using a tradable contingent security approach *S Adamson and A Sagar* 30:1, 43–51

Energy supply and demand
The turbulent liquid fuel industry in Zimbabwe: options for resolving the crisis and improving supply to the poor *K Mashange* 30:11/12, 1047–1055

LDCs
Can the urban poor afford modern energy? The case of Ethiopia *B Kebede, A Bekele and E Kedir* 30:11/12, 1029–1045
Demand for commercial energy in the state of Kerala, India: an econometric analysis with medium-range projections *D Parameswara Sharma, P S Chandramohanan Nair and R Balasubramanian* 30:9, 781–791
Direct and indirect energy requirements of households in India *S Pachauri and D Spreng* 30:6, 511–523
Evaluating the health benefits of transitions in household energy tehnologies in Kenya *M Ezzati and D M Kammen* 30:10, 815–826
Foreign direct investment and decoupling between energy and gross domestic product in developing countries *O Mielnik and J Goldemberg* 30:2, 87–89
Improving modern energy services for Africa's urban poor *S Karekezi and L Majoro* 30:11/12, 1015–1028
Poverty and energy in Africa – a brief review *S Karekezi* 30:11/12, 915–919
Power sector reforms in Ethiopia: options for promoting local investments in rural electrification *M Teferra* 30:11/12, 967–975
Power sector reforms in Zimbabwe: will reforms increase electrification and strengthen local participation *D Kayo* 30:11/12, 959–965
Renewable energy strategies for rural Africa: is a PV-led renewable energy strategy the right approach for providing modern energy to the rural poor of sub-Saharan Africa? *S Karekezi and W Kithyoma* 30:11/12, 1071–1086
The energy sector in Eritrea – institutional and policy options for improving rural energy services *S Habtetsion and Z Tsighe* 30:11/12, 1107–1118
The impact of large-scale renewable energy development on the poor: environmental and socio-economic impact of a geothermal power plant on a poor rural community in Kenya *N O Mariita* 30:11/12, 1119–1128
The prospects for local private investment in Tanzania's rural electrification *E E Marandu* 30:11/12, 977–985
Vehicle and fuel demand in Morocco *M Belhaj* 30:13, 1163–1174

National and regional energy profiles and government policy
Effects of internalising external production costs in a North European power market *J Munksgaard and J Ramskov* 30:6, 501–510
Photovoltaic module quality in the Kenyan solar home systems market *R D Duke, A Jacobson and D M Kammen* 30:6, 477–499
Price regulation in the Spanish energy sectors: who benefits? *P Arocena, I Contin and E Huerta* 30:10, 885–895
Regulatory reform and market development in power sectors of transition economies: the case of Kazakhstan *D Kennedy* 30:3, 219–233
Re-regulating district heating in Sweden *P Westin and F Lagergren* 30:7, 583–596

Nuclear power
Decision-making of nuclear energy policy: application of environmental management tool to nuclear fuel cycle *Y E Lee and K-K Koh* 30:13, 1151–1161
Japan's nuclear energy policy: from firm commitment to difficult dilemma addressing growing stocks of plutonium, program delays, domestic opposition and international pressure *S E Pickett* 30:15, 1337–1355

Oil and gas
Commercializing an alternate vehicle fuel: lessons learned from natural gas for vehicles *P C Flynn* 30:7, 613–619
The Mexican energy sector: integrated dynamic analysis of the natural gas/refining system *F Barnénes-Regueiro, M Leach and M Ruth* 30:9, 767–779

Renewables
Adding wind energy to hydropower *C Bélanger and L Gagnon* 30:14, 1279–1284
An integrated time-depending feasibility analysis model of wind energy applications in Greece *J K Kaldellis* 30:3, 267–280
Can natural factors explain any cross-country differences in carbon dioxide emissions? *E Neumayer* 30:1, 7–12
Comparing recommendations from the World Commission on Dams and the IEA initiative on hydropower *L Gagnon, J-E Klimpt and K Seelos* 30:14, 1299–1304
Cost-competitive incentives for wind energy development in China: institutional dynamics and policy changes *W-Q Liu, L Gan and X-L Zhang* 30:9, 753–765
Disseminating wind pumps in rural Kenya – meeting rural water needs using locally manufactured wind pumps *M Harries* 30:11/12, 1087–1094
Environmental impacts of energy utilisation and renewable energy policies in Turkey *K Kaygusuz* 30:8, 689–698
Ethical dilemmas and the decision-making process. Is a consensus realistic? *G G Bérubé and F Villeneuve* 30:14, 1285–1290
Explaining learning curves for wind power *K Ibenholt* 30:13, 1181–1189
Green electricity in the market place: the policy challenge *D A Fuchs and M J Arentsen* 30:6, 525–538
How European waste will contribute to renewable energy *R V Siemons* 30:6, 471–475
Hydropower as a renewable and sustainable energy resource meeting global energy challenges in a reasonable way *G W Frey and D M Linke* 30:14, 1261–1265
Hydropower in China *F Li* 30:14, 1241–1249
Hydropower potential and development activities *A Bartle* 30:14, 1231–1239
Hydropower projects: a review of most effective mitigation measures *S Trussart, D Messier, V Roquet and S Aki* 30:14, 1251–1259
Hydropower – the politics of water and energy: introduction and overview *F H Koch* 30:14, 1207–1213
Interactions between the power and green certificate markets *S G Jensen and K Skytte* 30:5, 425–435
National patterns of research output and priorities in renewable energy *A Uzun* 30:2, 131–136
New renewable energy developments and the climate change issue: a case study of Norwegian politics *A C Christiansen* 30:3, 235–243
Photovoltaic module quality in the Kenyan solar home systems market *RD Duke, A Jacobson and DM Kammen* 30:6, 477–499
Policy instruments fostering wind energy projects – a multi-perspective evaluation approach *N Enzensberger, M Wietschel and O Rentz* 30:9, 791–801
Promoting equity in large-scale renewable energy development: the case of Mauritius *K Deepchand* 30:11/12, 1129–1142
Recommendations for sustainable hydroelectric development *J-É Klimpt, C Rivero, H Puranen and F Koch* 30:14, 1305–1312
Renewable energy for rural development in Ethiopia: the case for new energy policies and institutional reform *W Wolde-Ghiorgis* 30:11/12, 1095–1105
Renewable energy sources project appraisal under uncertainty: the case of wind energy exploitation within a changing energy market environment *K Venetsanos, P Angelopoulou and T Tsoutsos* 30:4, 293–307
Renewables in Africa – meeting the energy needs of the poor *S Karekezi* 30:11/12, 1059–1069
Substitution potential of wind energy in Egypt *M A H El-Sayed* 30:8, 681–687
The diversity of hydropower projects *D Egré and J C Milewski* 30:14, 1225–1230
The environmental legal and regulatory frameworks. Assessing fairness and efficiency *G G Bérubé and C Cusson* 30:14, 1291–1298
The evolving context for hydropower development *E Oud* 30:14, 1215–1223
The potential contribution of renewable energy in air pollution abatement in China and India *J C Boudri, L Hordijk, C Kroeze, M Amann, J Cofala, I Bertok, L Junfeng, D Lin, Z Shuang, H Runquing, T S Panwar, S Gupta, D Singh, A Kumar, M C Vipradas, P Dadhich, N S Prasad and L Srivastava* 30:5, 409–424
Using conjoint analysis to quantify public preferences over the environmental impacts of wind farms. An example from Spain *B Álvarez-Farizo and N Hanley* 30:2, 107–116

The role of utilities
Distributed generation and distribution utilities *N Strachan and H Dowlatabadi* 30:8, 649–661
